Registration number:17BEC0656

SLOT:TG1

Date:26<sup>TH</sup> FEB 2019

## DESCRIPTION

Near field communication is a new vision to develop communication between integrated devices. The above model was inspired to overcome the conventional wired networks.

The pens and the wires depict the traditional telephone wires for communication. They have paved a way like ladders to the new wireless technologies like near field communication. The 2 card board boxes depict 2 cellular devices.

“Ambition is like putting a ladder against the sky.”
